

A0030: generation, 2048-token prefix + 128 growing decode steps

2.836B BF16 · RTX 5090 · last-token logits + real KV cache · random weights/tokens
6 independent process blocks; two-sided 95% t intervals (df=5). Screening excluded.
Retained-source diagnostic data; not independent final target acceptance.
Output-token throughput includes prefix time; predetermined tokens, not a quality evaluation.
