

A0028: complete-matrix GPU and host memory

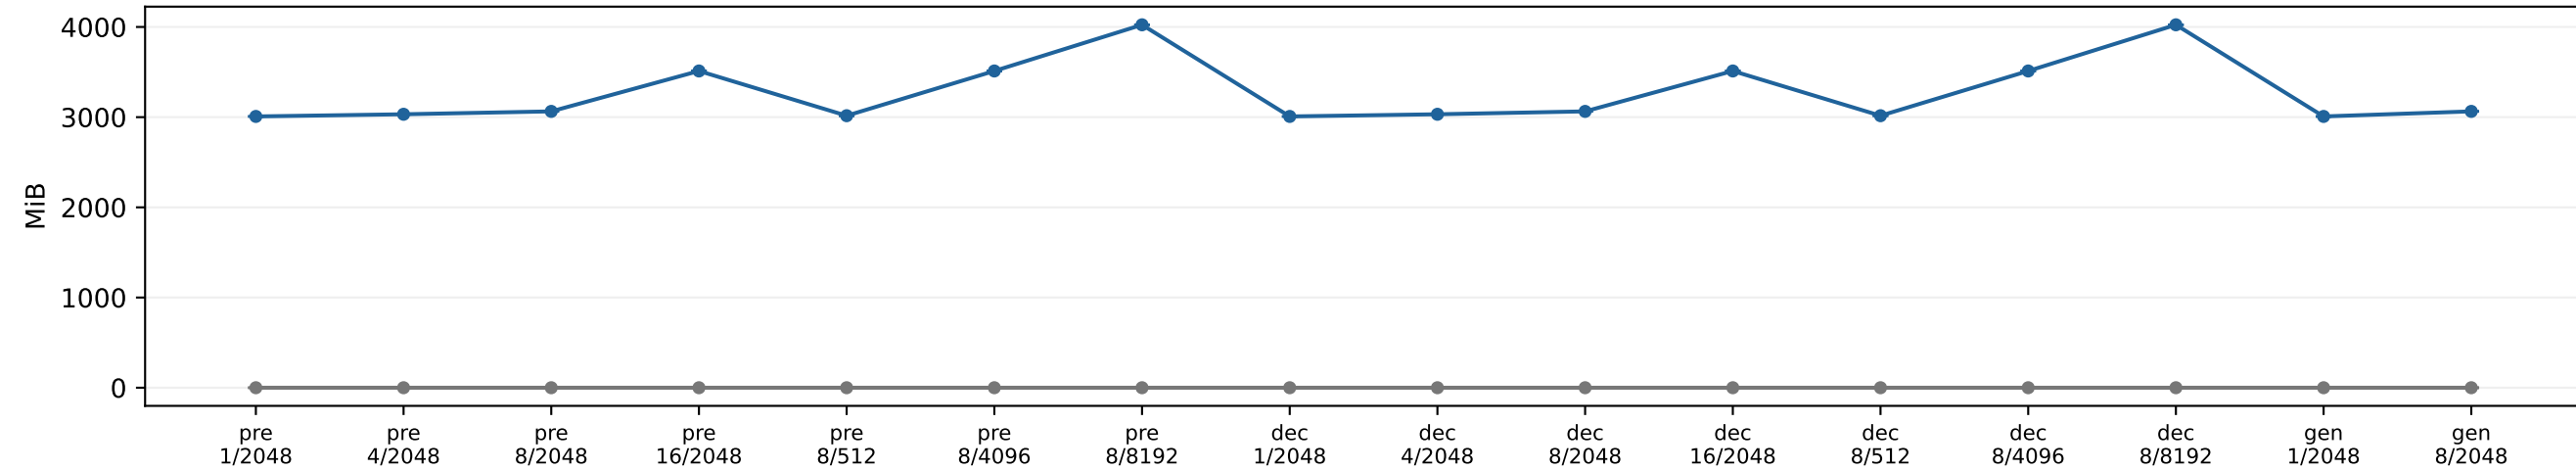

Peak allocated GPU memory

Host process RSS after workload

Pinned host table + staging buffers

2.836B BF16 · RTX 5090 · last-token logits + real KV cache · random weights/tokens
 Three independent process blocks; two-sided 95% t intervals (df=2). Screening excluded.
 Retained-source diagnostic data; not independent final target acceptance.
 Host RSS includes runtime and retained loading state. Pinned table is counted once; not added to RSS.
