

A0020 independent confirmations; positive = improvement

2.8365B BF16 / RTX 5090; 3 fresh balanced process blocks, two-sided 95% paired t intervals (df=2).
Green: joint latency/gap Holm gate and memory/resident checks pass; local performance evidence, not automatic acceptance.
Screens excluded; all measured selected points retained. Prefix/last-token-logit/KV and generation scope match the campaign.
